

KHARKIV NATIONAL MEDICAL UNIVERSITY

Dear Students,

Welcome to Kharkiv, which is a regional centre of Ukraine and worthy of its title of a “Ukrainian megalopolis”! The city has over 60 research institutes, 170 comprehensive schools, 150 educational centres; the number of higher educational establishments with different patterns of ownership has by now reached 80. Annually, about 20,000 young specialists graduate from higher educational establishments of our city.

Kharkiv National Medical University is an integral part of the scientific, intellectual and cultural history of the country, one of the oldest medical establishments of Ukraine, a member of the International Association of Universities. Since 1951, university has become one of pioneers in training medical personnel for different countries of the world. During this period our educational establishment has graduated over 7,000 specialists for 120 countries of Asia, Africa, Latin America and Middle East.

Our University will help you to become a high-level specialist and will provide with facilities for your further professional progress and career. We hope that the education, which you will receive at our University, is only the first step on the way of your life achievements, therefore we believe, that our further professional cooperation will be fruitful and long-lasting.

*Faithfully yours,
Rector Prof. Vladimir N. Lesovoy*

INTERNATIONAL RELATIONS

Kharkiv has a worldwide network of cultural and economic relations; this is reflected in the student body of the university.

Kharkiv National Medical University (KNMU) has bilateral cooperation agreements with partner institutions around the world, is an active partner in a variety of international exchange programmes, and receives a large number of foreign PhD students, researchers and visiting professors.

Kharkiv National Medical University (KNMU) has bilateral cooperation agreements with partner institutions around the world, is an active partner in a variety of international exchange programmes, and receives a large number of foreign PhD students, researchers and visiting professors.

Kharkiv National Medical University (KNMU) constantly keeps in touch with its graduates: Many of them have become highly qualified doctors, known scientists, health service managers and political figures in their mother countries.

KHARKIV

Ukraine's second biggest city doesn't look provincial, and for good reason: for over 15 years, from 1919 to 1934, it was Ukrainian capital. That's one of the reasons why Kharkiv's scientific and cultural levels are so high (as well as its industrial level, too). The city, in fact, is famous for its educational institutions.

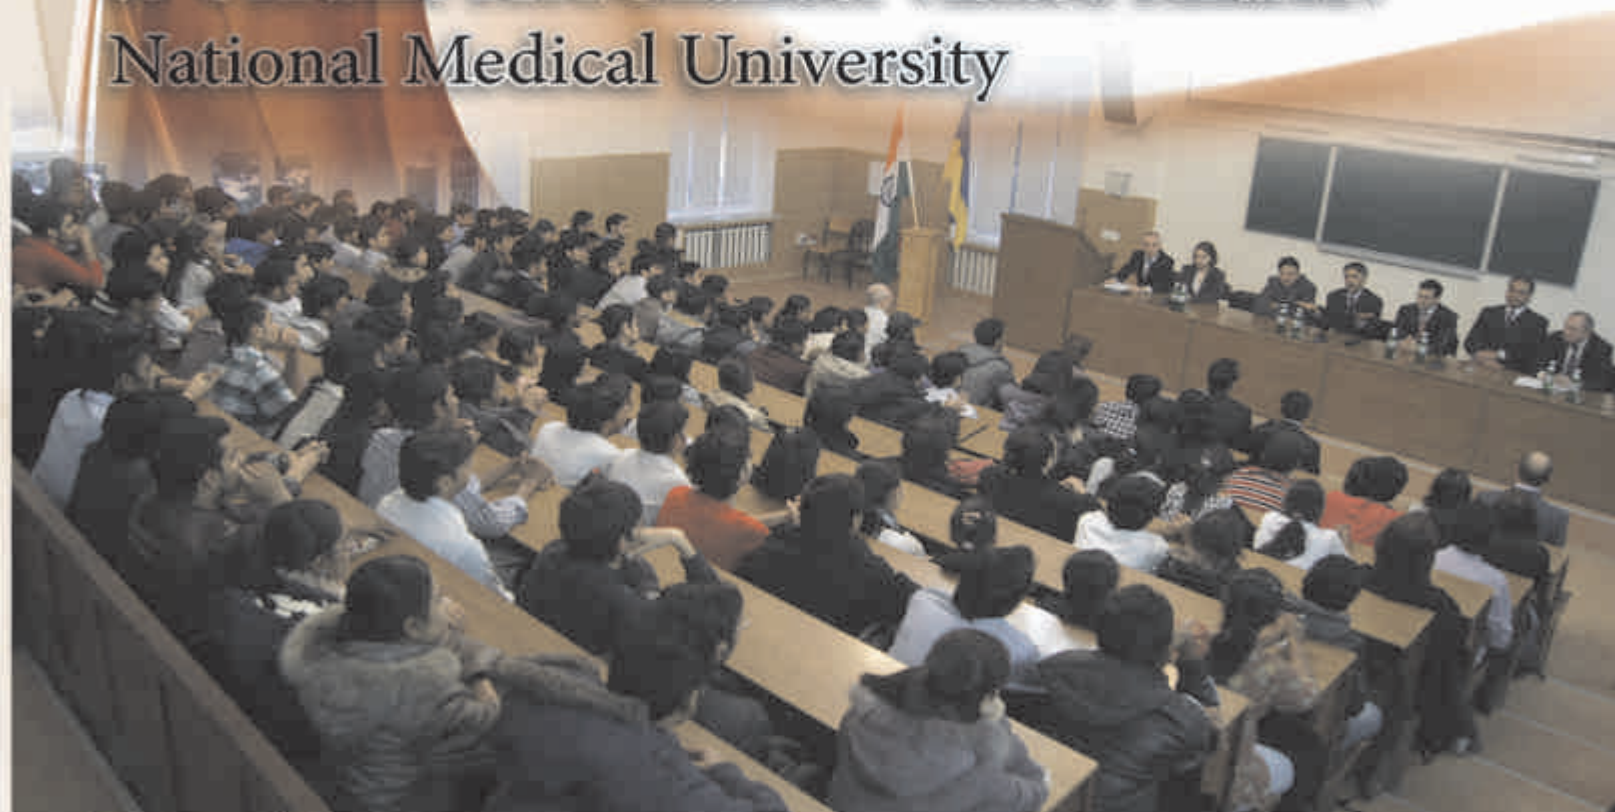

Kharkiv's climate is humid continental with cold and snowy winters, and hot summers. The seasonal average temperatures are not too cold in winter, not too hot in summer: -6.9°C (19.6°F) in January, and $+20.3^{\circ}\text{C}$ (68.54°F) in July. The average rainfall totals 513 mm (20 in) per year, with the most in June and July.

The old center of Kharkiv is located around University Hill, named for the Kharkiv Imperial University, which started life in 1805 (today it's known as the Kharkiv National University). The city also boasts the Kharkiv Polytechnic Institute, the Kharkiv National University of Radio electronics and other educational institutions. In addition to the 45 universities there are also 60 scientific research institutions, 16 museums, the city art gallery, six public theaters, 80 libraries and the country's oldest observatory in Kharkiv. Such are the facts that confirm Kharkiv's status as Ukraine's academic and scientific capital.
